

Deadline : 21-5-2022

Write a program that stores a set of books into library. The program needs to input and keep track of all books. The book record includes: book number, book name.

Use Stack based on linked list to store books.

Main Menu

- 1. Add book
- 2. Show all books
- 3. Delete book
- 4. Search book
- 5. Sort books
- 6. Exit

Notes:

- Not participating in the implementation of the project.
- Copying the project will cause you to lose the project score.
- Each student will be discussed.
